DMR Portable Two Way Radio

D12

User Manual

Welcome!

Congratulations on your purchase of our instant communication equipment. Our products will provide you with high quality, clear voice, reliable and easy to use bidirectional person-to-person voice communication for your safety and improving efficiency.

Our products will keep you in constant touch with your team members for years to come with negligible maintenance down-time.

Please take a few minutes to read this manual carefully. The information presented here will allow you to derive maximum performance from your radio, in case questions arise later on.

Accessories List

Carefully unpack the radio and accessories. File a claim with the dealer immediately if any items are missing or damaged.

Antenna

Li-ion Battery

Belt Clip

Charger

Adapter

User Manual

GETTING ACQUAINTED

Orientation

BASIC OPERATIONS

Turn the Power On or Off

Turn the [**Power/Volume Switch**] clockwise to turn the radio ON. The radio chirps.
Turn the [**Power/Volume Switch**] counter clockwise to turn the radio OFF.

Adjusting the Volume

Rotate the [**Power/Volume Switch**] to adjust the volume. Clockwise increases the volume and counter clockwise decreases it.

Selecting a Channel

Turn the [**Tuning Control**] clockwise or counter clockwise to select your desired channel.

Transmitting

To communicate, all radios should be in the same channel/frequency and signaling & encryption (CTCSS tone, DCS code, AEC ect.). Press and hold [**PTT**] button and speak.

Receiving

Release the [**PTT**] button to standby, your dealer may have programmed CTCSS/DCS, Scrambler signaling ect. in your radio.

ADVANCED OPERATIONS

High/Low Power Toggle

This feature allows you to switch between high and low power modes on the radio..

One Touch Access 1~6

The One Touch Call/Message feature allows you to quickly initiate a preset service. The following table shows the services that can be implemented by this feature and the corresponding operations.

- 1.None
- 2.In analog channel: DTMF call---DTMF contact list
- 3.In digital channel: Call, Kill, Revive, Remote Monitor(only for decode)---Contact List

Repeater/Talk Around

This feature can be very useful when the repeater is nearly out of range, is not operating, or if the radios that are communicating with one another are within range of one another and simplex communications are preferred. If you select talk around, the radio will communicate directly to the radio on the other end of the connection instead.

Privacy On/Off

For the radio with the encryption function turned on, calls must be made with the same privacy type and key. If your radio receives calls with different encryption key values, you will hear garbled sounds. Privacy name and key should be pre-programmed through software.

VOX On/Off

When VOX is activated, your radio automatically turns itself on when the user starts talking, and shuts off when there is no sound. This feature saves you having to push the microphone button every time you want to start transmitting.

Zone Toggle

The radio can support up to 4 zones, up to 16 channels can be added to each zone, and 4 zones can support up to 64 channels. The programming buttons can be preset through the programming software (two or more zones must be set before using zone toggle).

Lone Work On/Off

In digital channel, this safety feature requires operators to check in at certain intervals of time. If the user does not check in within that time frame, an alert is triggered. When an emergency alert is not selected, this function is disabled.

Record On/Off, Playback, Delete

Pre-program **TK**, **SK1**, **SK2** as the relative feature, then short press (or long press) it to turn on/off the recorder, playback or delete the record.

OPTIONAL PAID FEATURES

Noise Reduction

Noise reduction is the process of removing noise from a signal, in order to improve background sound quality to be clearer. Especially if you use the radio in a noisy environment, it will be very helpful to improve the sound quality of the radio you hear.

Note:

- 1.The feature is only supported to set through programming software which with noise reduction function.
- 2.The feature is only supports the radio with noise reduction function.

Recorder

If the radio turns on the recorder function through the programming software, it will automatically record in segments when transmitting or receiving. The recording file will be created at intervals of several seconds. When the recording storage space is full, the later segments of voice will cover the first segment of voice.

Note:

- 1.The feature is only supported to set through programming software which with optional recorder function.
- 2.The feature is only supports the radio with recorder function.
